

Bingo for falls prevention!

# About this game

Bingo is a fun and easy game for people of all ages. This bingo has been adapted for falls prevention education.

The 5 letters for the word 'bingo' represent 5 different categories of falls prevention strategies.

- B = behaviours
- I = indoors
- N = nutrition
- G = get active
- O = outdoors

In total, there are 75 falls prevention tips and strategies in this bingo. Each bingo card has a random selection of 25 numbers. The game is played using the usual rules of bingo, and opportunities to discuss the strategies can be taken during the game.

If you like, you can offer inexpensive falls prevention themed prizes directly related to the strategies. Examples include:

- glasses cleaning cloths
- non-slip adhesive floor strips
- meal planners
- Dosette boxes
- pet collar with bell
- night light
- water bottle
- light exercise weights
- walking stick rubber tip
- small plastic baskets.

Thank you to Tracey Anthill, occupational therapist at Sir Charles Gairdner Hospital for granting permission for the bingo to be used as part of No Falls November 2024.

For more information and to get involved contact <u>healthpolicy@health.wa.gov.au</u>

	Behaviours				
1	Have your eyes checked annually				
2	Manage chronic health conditions well				
3	Take medications as directed				
4	Use a Dosette Box or Webster pack for medications				
5	Don't mix alcohol and medications				
6	Clean your glasses regularly				
7	Get adequate rest and sleep				
8	Have a medication review with your GP or pharmacist				
9	Speak to your doctor if you notice changes in your body				
10	Wear supportive shoes with broad and flat heels				
11	Use the nurse call bell				
12	See a podiatrist if you have problems with your feet				
13	Keep your brain active				
14	See your GP if you have continence issues				
15	Wear non-slip socks				

	Indoors
16	Use handrails
17	Keep your phone nearby or use a pendant alarm
18	Don't polish floors and clean up spills immediately
19	Ensure adequate, even lighting
20	Use a non-slip mat or strips in the bathroom
21	Put a bell on your pet's collar
22	Remove clutter
23	Remove floor rugs
24	Use a night light or movement sensor light
25	Store cords out of the way
26	See an OT if you need help with daily activities
27	Check that your seating is sturdy and at an appropriate height
28	Sit down to dress and shower if your balance is affected
29	Carry laundry in a bucket so you can see in front of you
30	Use a laundry basket on wheels

	Nutrition				
31	Eat protein at each meal to maintain your muscle				
32	Drink 2 litres of fluid daily to stay hydrated				
33	Eat a variety of nutritious foods				
34	Eat a variety of fruits and vegetables				
35	Try to maintain your weight				
36	Eat oily fish, margarine and eggs for vitamin D				
37	Get appropriate sun exposure to maintain adequate vitamin D levels				
38	Eat 2 to 3 serves of dairy foods for calcium				
39	Ask your GP or dietitian if you need to take a dietary supplement				
40	See a dietitian if you are losing weight without trying				
41	See a speech pathologist if you have difficulties swallowing				
42	Ask for meal delivery services if you need help preparing meals				
43	Accept offers of assistance for shopping and cooking				
44	Have regular oral health checks				
45	Talk to your GP to manage medication side effects				

	Get active				
46	Strengthen your legs – ask your physio how				
47	Improve your balance to help prevent falls				
48	Move your body daily				
49	Do some gentle stretches				
50	Do some gardening				
51	Walk as much as you can				
52	Do your physio exercises				
53	Don't "plonk" into chairs – sit slowly and in a controlled way				
54	Check walking stick rubber tip regularly				
55	Ask a physio about exercise that is suitable for you				
56	Use a walking aid if prescribed				
57	Make sure your walking aid is at the correct height for you				
58	Practise functional activities such as sit to stand transfers				
59	Challenge your balance safely				
60	Do resistance training to improve bone density				

R

	Outdoors				
61	Choose well-lit paths				
62	Keep walkways clear				
63	Put hoses away				
64	Use walking aid if prescribed one				
65	Report trip hazards in hospital				
66	Sweep or rake paths				
67	Ask for help with keeping outdoor areas safe				
68	Wear good, supportive shoes				
69	Don't wear slides or sloppy slippers				
70	Place seats at strategic points for rests				
71	Allow time for your eyes to adjust when moving outdoors or indoors				
72	Contact your council if there are hazards (e.g. uneven paths)				
73	Ask your council or a neighbour for help with your rubbish bins				
74	Take extra care in wet conditions				
75	Make sure stairs and steps are well lit
