Influenza Vaccination Uptake in 2025

Dr Rachel Foong
Senior Epidemiologist
Immunisation Program

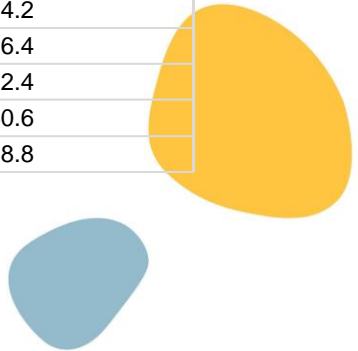

WA Influenza Vaccination Coverage

WA Influenza Vaccination Coverage

	2021	2022	2023	2024	2025
6 months - < 5 years	25.1	28.6	27.5	22.5	24.2
5 years to - <12 years	16.4	19.9	19.3	14.0	16.4
12 years - <65 years	26.0	30.1	25.6	20.4	22.4
≥ 65 years	64.2	70.1	65.4	59.8	60.6
All age groups	31.2	35.5	31.8	26.7	28.8

Coverage by Aboriginal status and Area

National coverage

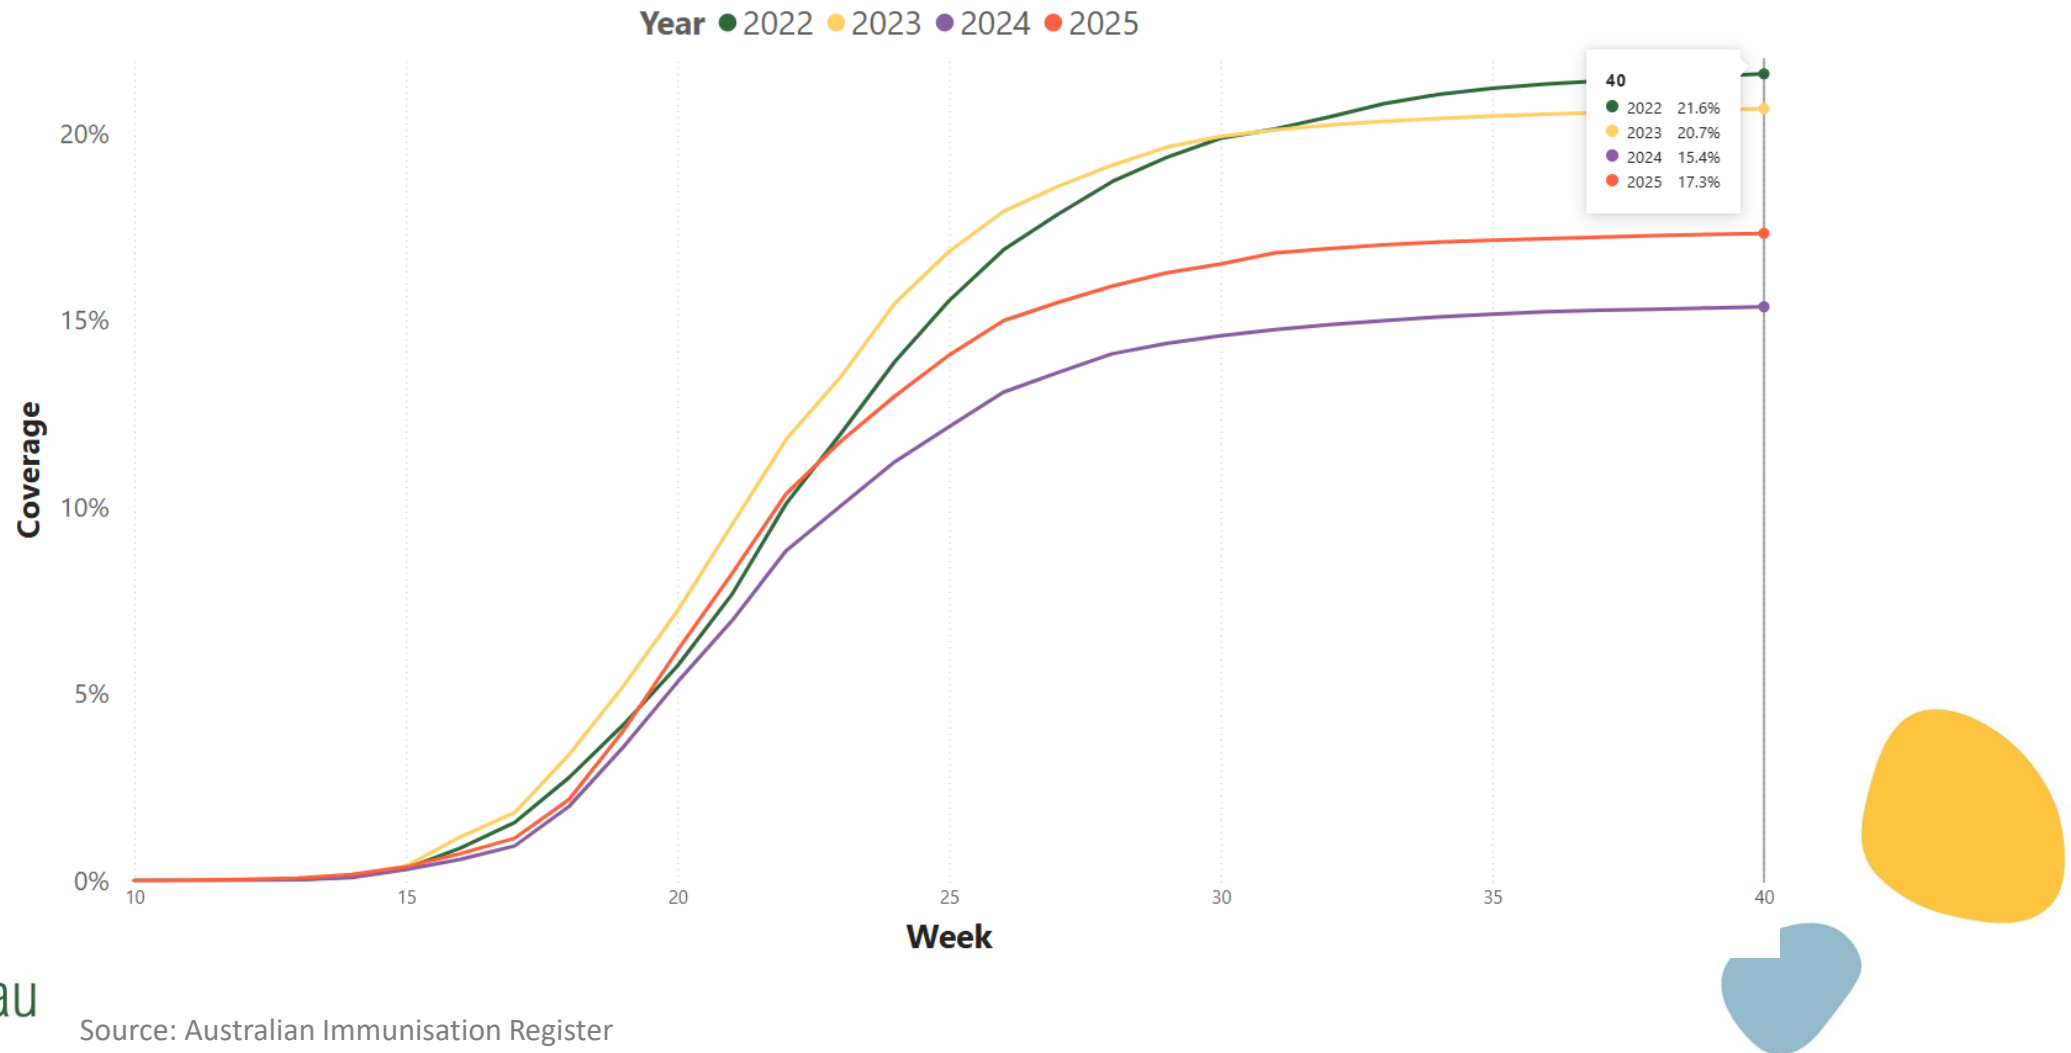

All persons

	ACT	NSW	Vic	Qld	SA	WA	Tas	NT	AUS
6 mo-<5 yrs	48.4	24.4	30.4	20.1	27.6	23.0	29.6	35.4	25.7
5-<15 yrs	24.3	13.3	16.0	13.2	15.3	15.3	14.8	12.8	14.5
15-<50 yrs	32.7	19.5	23.7	18.3	23.6	18.8	23.4	21.5	20.8
50-<65 yrs	44.3	30.1	34.2	31.4	36.2	30.9	39.4	25.4	32.3
≥65 yrs	66.0	58.2	61.8	60.4	66.6	59.8	67.9	34.9	60.5

* Year-to-date (YTD) coverage calculated using vaccinations given 1 March–31 August 2025 (inclusive).
AIR data as at 7 September 2025.

Coverage data in these tables may differ slightly from estimates published elsewhere due to differences in calculation methodologies and/or the AIR data being used in the calculation having been downloaded on different dates.

Coverage in children aged 2–11 years

Influenza Vaccination Providers

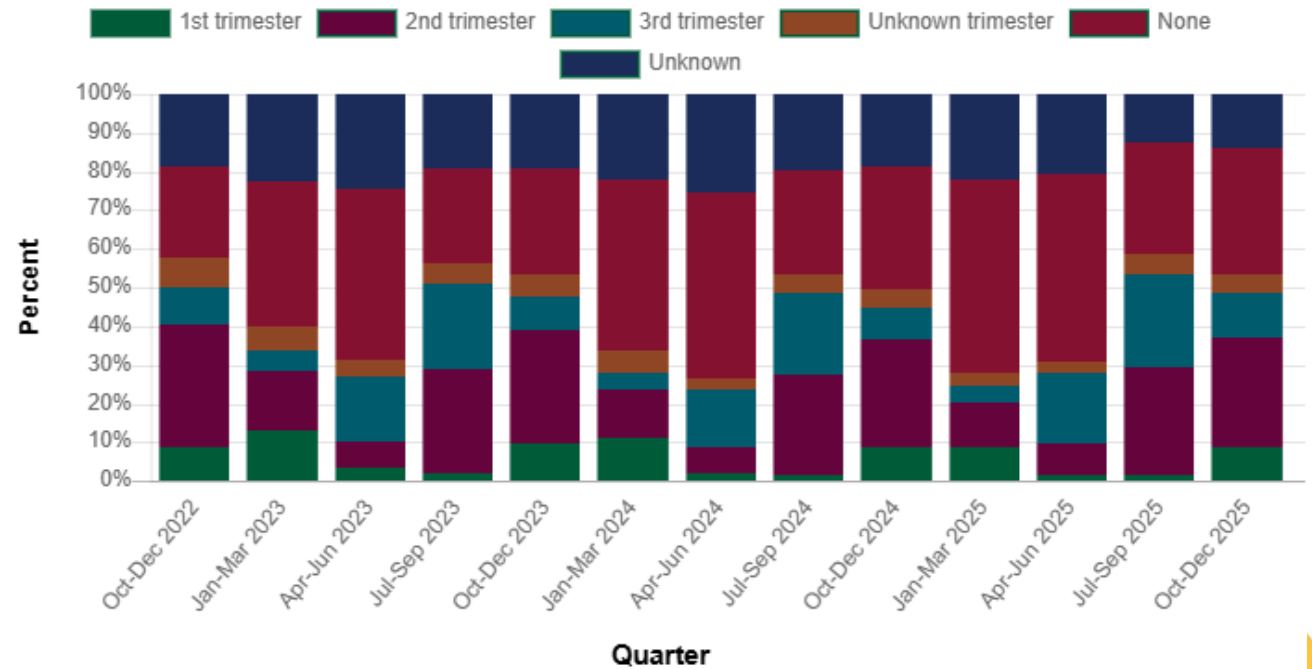

Free Influenza Vaccination Program

Year	April	May	June	July	Program change
2021	6.1%	16.2%	20.7%	22.4%	-
2022	5.4%	17.1%	26.0%	29.0%	+11.9
2023	4.4%	18.8%	23.8%	24.9%	+19.4
2024	2.9%	14.0%	18.5%	19.6%	+15.6
2025	3.1%	15.4%	20.2%	21.6%	+18.5

Months of the Free Influenza Vaccine Program shaded in the table.

Antenatal immunisation

Source

Midwives Notification System, Information and System Performance Directorate, Department of Health WA.

Data extracted 06 February 2026

Recording to the AIR

- Records on the AIR enable program monitoring, vaccine effective studies and for ensuring vaccine safety.
- Avoid data entry errors to ensure data quality i.e. selecting wrong vaccine FLUAD QUAD, checking eligibility.
- Check warning messages and report any vaccine administration errors to WAVSS.

Key points

- Influenza vaccination coverage was higher in 2025 compared to 2024 across all ages.
- Coverage in children aged <12 years is suboptimal. There will be enhanced monitoring to determine if the FluMist nasal influenza vaccine increases coverage in young children.
- Improved ability to report on antenatal influenza vaccinations from the AIR in 2026.
