

Keeping our mob healthy

Caring for

Eczema also known as atopic dermatitis (x-ma) (a-top-ik) (derm-a-tai-tis)

- Eczema is when the skin gets red, itchy, dry and bumpy.
- It is very common and can start in the first few months of life.
- There is no cure for eczema but it can be well looked after.

Somethings that can irritate the skin are:

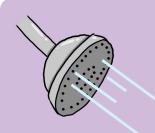

Looking after bub's skin

- Use moisturiser cream every day even if you can't see any eczema on bub's skin, this will reduce skin irritation.
- Put moisturiser cream on the whole body after a bath or shower, apply to wet skin then pat dry.
- Thick ointments and moisturiser creams are better than lotions.
- Wash your hands before applying moisturiser. If it is very hot use a cream as ointments can make bub feel too hot.
- Over heating, warm clothes or over wrapping bub in a blankets can make the itch worse.

Showers or baths

- Bath or shower once a day, for no longer than 5 mins
- Water needs to be lukewarm and not too hot

• Use **soap free** products, no bubble bath

Treating flare-up

Eczema can get infected. As soon as you see signs of flare-ups (red, rough, and itchy):

- Put on cortisone ointment (as prescribed).
- Put moisturiser cream over all of bub's body once a day, after a bath or shower. If bub's skin feels dry apply more than once a day.
- · Keep putting cortisone ointments or moisturiser cream on until the eczema has gone.
- Start the cortisone ointment as soon as the eczema comes back.

Cool compresses - A wet dressing for the face to help itchiness

Wet a cloth in cool water then wring it out

Hold the cloth onto the area for 5 to 10 min

Then put on moisturiser cream

Recommendations just for bub:

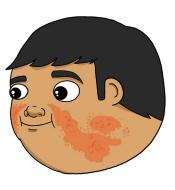

Wet dressings – For better sleep when flare-ups happen

- Do this when bub is very itchy and not sleeping well.
- Yarn to a doctor or nurse about how often to do wet dressings.

2. Put cotton shirt and 1. After a bath or shower, pat skin dry and put cortisone pants in a bowl of ointment on all eczema areas lukewarm water, then wring out and put the clothes on 4. Take off wet and dry clothes 3. Put dry shirt and pants on and put moisturiser cream on over the wet clothes, keep on the whole body and face and get for 20 mins dressed in clean dry clothes

Recommendations just for bub:

Bleach bath

Bleach baths can be helpful for children who get lots of skin infections.

• Yarn to a doctor or nurse about how often to do bleach baths.

Fill a bath tub **half way** with lukewarm water
Yarn to your doctor or nurse about your bath size

3. Add 1/4 cup of White King bleach

You don't have to rinse the bleach off, use a clean towel to pat the skin dry

Wash bub's face and scalp keeping away

from bub's eyes. Gently wipe any crusts off the skin. Bub can stay in the bath for 5 to 10 minutes

Then put moisturiser cream over bub's whole body and face
