

Vaccines

Influenza (flu)

What is influenza (flu)?

Influenza, or “the flu”, is caused by a virus that affects the nose, throat and lungs and can easily spread within families, schools, day care and the community.

Symptoms of the flu:

Fever

Cough or noisy breathing

Nausea and vomiting

Diarrhoea

Headache, muscle aches, tiredness

Sore throat and runny nose

Loss of appetite or poor feeding

Irritability

How serious is the flu for children?

- 1 in 3 children who catch the flu go to hospital.
- The influenza virus strains changes every year -that's why having the flu vaccine each year is important.

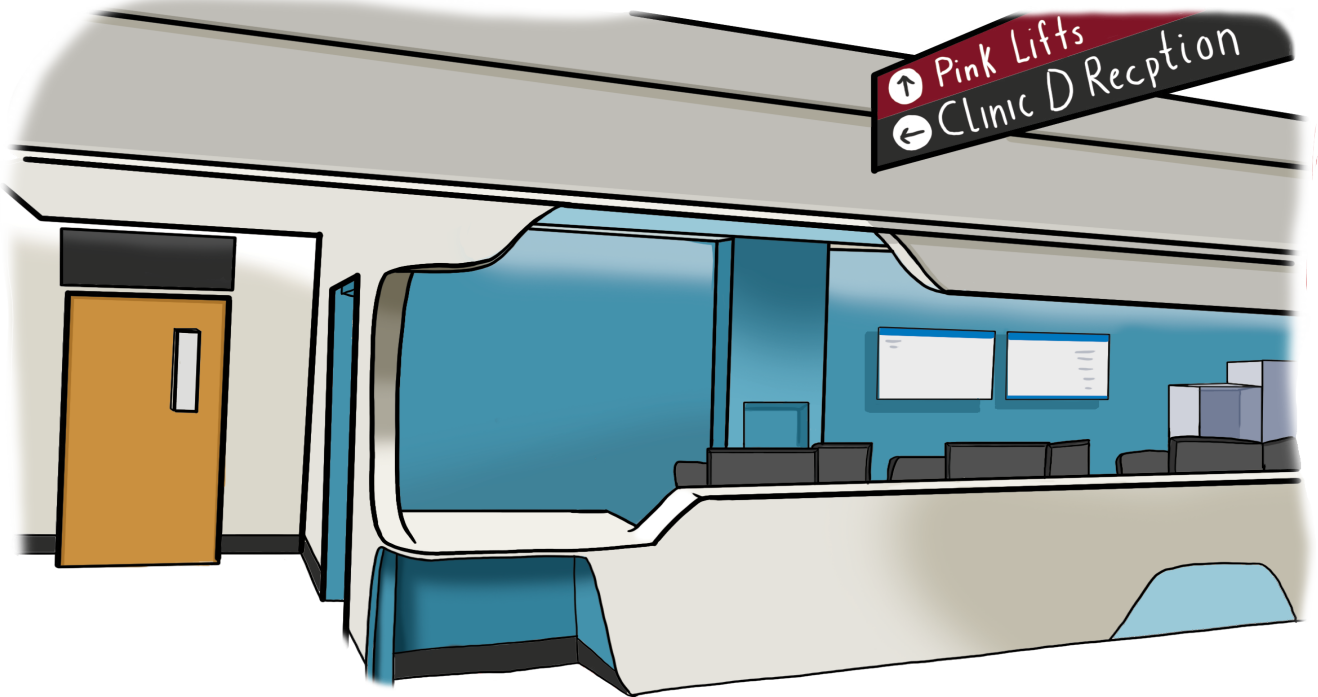

Good to know

- To build bubs immunity they should have the yearly flu vaccine from 6 months of age.
- Visit www.aefican.org.au or www.ausvaxsafety.org.au for vaccine safety monitoring information on WA immunisations.
- You can check out the Healthy WA website at ww2.health.wa.gov.au for more vaccine information.

The flu vaccine is FREE for Aboriginal and Torres Strait Islander people, from 6 months of age onwards.

Where get the flu vaccine?

Visit the PCH Stan Perron Immunisation Centre, Level 1, Clinic D, from 8.30am to 4.00pm. If you have any questions please call **6456 3742**.
